Hot Ramp Rehab

The Phase II start date is now Thursday, July 7th, to better fit the contractor's schedule for people and equipment. The orange and white barricades will surround the work area and Gate 3 will be used only for contractor vehicle access for the duration of the project. The closure of a section of Taxiway C and the Foxtrot connector will mean that accessing the Silverhawk fuel island will require you to taxi down Alpha past Echo to the end and return to the pump area via Taxiway C. Use caution because the helicopters plan to launch and recover from the newly paved Transient Apron area adjacent to the Silverhawk hangar. For easier fuel access you can make use of the Shore & Shore Aviation fuel pump at their mid-field location near the Golf connector. The project should be completed at about the end of July.

Taxiway B Lights

Taxiway B and the B2 connector now have their edge lights and lighted signs! The lights should respond to the same pilot control that's been available for the runway and Taxiway A. During the project the contractor also installed two street lights near the terminal side of the Hubler Terminal apron to improve nighttime visibility in that area.

Operations Notes:

- **KEUL Area Pilot Meeting** - Tuesday, September 20th, 7 – 9 PM.
Representatives from Big Sky Approach, Boise Tower, the FAA Safety Team, Idaho Division of Aeronautics, and the Boise National Weather Service office are all planning to participate in our meeting and talk about current issues with our pilots.
More info will follow as we get closer to September 20th.
- **On a related note** - the Division of Aeronautics Safety Stand-down Day this year will be Saturday, October 29th.
