Hello **Rob**,

Hangar Inspection Program

It's been a great year! We are down to the final hangar or two to complete the 2024 inspections. Those visits have gone well – give or take some complications since many of our hangar owners and pilots are on-the-go and often out of the area. Hangar owners, please remember that it's a part of your lease agreement to keep Lisa informed as things change with any renters you have and what "N" numbered aircraft are in your hangar.

A.I.P. Construction Project

Thank you to all airport users for your cooperation during the times that normal runway operations had to be disrupted to complete the construction project. The NOTAMs were all cancelled last Friday and over the next week or so the contractor will complete a few final cleanup tasks to finish the project.

As with all projects that affect asphalt surfaces, the final striping with glass beads will be completed in the Spring.

Winter is coming

This is an annual reminder that taxi lane courtesy demands that we all keep our wheeled vehicles on hard surfaces and avoid driving through the rough areas. Those rough areas can quickly become muddy with a seemingly small amount of rain or melting snow. The mud and gravel we track onto the asphalt can mix VERY badly with aircraft and especially with the props on fixed wing aircraft. Please be considerate to protect both your neighbors and you from potentially expensive, avoidable damage.
