Water

Water is a metered service. We measure in c.f. "cubic feet" (1 unit represents 100 c.f.) in every 1 unit there is 748 gallons of water.

Water base \$6.48

Water usage fee \$1.210per c.f.

How many gallons are you using? (c.f. x 748 = gallons)A customer that uses 5 c.f. (5 x 748 = 3,740) is using 3,740 gallons of water.

How much will it cost to fill a swimming pool? Convert gallons to c.f. (gallons divided by 748 =c.f.)

If you are filling a swimming pool and it is 10,000 gallons (10,000 div by 748 =13.37 c.f.) cost would be (13.37 x 1.210 =\$16.18)

Sewer

Residential accounts are billed on a winter average based on water usage used in the months of December, January, and February. This amount will be recalculated each year and will appear on your April 1st billing.

Commercial accounts are based on water usage each and every month

Sewer Base: \$11.10

Sewer usage fee: \$1.682 per c.f.

Sewer Surcharge: 60% of sewer rate (capital improvements on the sewer and treatment plant)

If you have a winter average of a 5 you would figure 5 x \$1.682 =\$8.41 plus base charge \$11.10 = \$19.51 plus 60% surcharge \$11.71 your total cost of sewer would be \$31.22

(usage x \$1.682=sum + sewer base \$11.10=sum x 60% =surcharge sum + sewer sum)
