Caldwell Engineering Department has the following active projects for January 2019:

Indian Creek Greenbelt Daylighting: Demolition of the Sundowner Hotel is now complete. The creek channel has full landscaping and walking paths are ready for use. Historical information signs are to be installed within the coming months to round out this greenbelt addition.

Boise River Streambank Restoration: The city is working through the final stages of construction to repair riverbanks and sections of the greenbelt that were damaged in the 2017 spring flood. The city is attempting to qualify for reimbursement for federal aid funds at the completion of the project.

10th Ave. Bridge Replacement: The City is currently planning to replace the bridge at 10th Avenue and Arthur Street over Indian Creek. Construction plans are approved and the city is currently seeking federal funding.

L.I.D. 16-1 Utility Connection Fees: City Council has adopted the ordinance to create L.I.D. 16-1, an L.I.D. initiated by the City to help defray the costs to property owners who wish to connect to municipal water, sewer, and irrigation. It's intended for use by property owners with existing structures occupied prior to the adoption of the ordinance. Costs can be financed over a 10-year period. This L.I.D. is currently open and ready for use. For more information, contact TJ Frans at 455-3006.

Ustick & Florida Roundabout: The City is currently planning to construct a roundabout at this intersection in 2020. Construction plans are currently in the design process. We anticipate the relocation of utilities sometime in 2019.

Ustick & Middleton Roundabout: The City is currently planning to construct a roundabout at this intersection in 2021. Construction plans are currently in the design process.

Hwy 19 & Centennial Way Intersection: The City is currently planning to construct a roundabout at this intersection and is in the preliminary design stages. A construction year for this project will not be determined until final design is complete.
