RE: Phosphorus

Date: 08/15/2019

To Whom It May Concern,

The City of Caldwell Wastewater Treatment Facility would like to inform the EPA that a required sample for Permit #ID0021504 was not collected and analyzed for the monitoring period from 06/01/19 to 06/31/19. The required sample was Phosphorus, Total as P (year-round), on the 001-External Outfall, permit code 00665. Due to the multiple sampling suites the City was collecting during the month of July, the phosphorus sample was inadvertently missed. The City of Caldwell will take measures to ensure the sample will not be missed in the future.

Sincerely,
Sal Arreola, City of Caldwell
