Laboratory Statement
Caldwell, ID WWTP
EPA Lab Code: ID00949
NPDES Permit: ID0021504

I certify that this data is in compliance with requirements under 40 CFR §136 and other analytical requirements specified in NPDES permit ID0021504. We have a loss of Influent flow data for approximately 12 hrs on January 13, 2016 during the collection of the Influent composite sample due to equipment upgrades, therefore the influent total phos pounds will be calculated using the remaining flow data.

Following an email conversation with Maria Lopez December 20, 2016, we used the 1985 EPA *NPDES Self-Monitoring System User Guide* as a guide for performing our DMR calculations per her suggestion, with the exception of following the 22nd Edition *Standard Methods for the Examination of Water and Wastewater* rules for rounding and significant figures (SM 1050).

Rodger Hawker, Laboratory Technician

Patricia Zarate, Laboratory Technician
