

IPAP
Infant and Preschool
Aquatics Program

Infant (6-24 months) or Toddler (24 - 36 months)

Parent must accompany child in the pool. Parent and child will work together in the pool under the direction of a certified instructor to gain both a respect for and enjoyment of the water. Children will dip their faces into the water, blow bubbles, kick water, walk in water, as well as practice water safety. Children who are not "potty-trained" need to wear swimming diapers.

These classes may be combined to meet minimum enrollments.
